**Limited spots are available so please RSVP early!

Please Register by Sunday, October 16th, at 11:59 PM.

**Andrew Eisenbraun,
P.E., M.ASCE**

From the President

Hello ASCE Nebraska Members,

Fall weather and activities are here and we are getting back into the swing of ASCE events. Thank you to all who came to the Structural Meeting and Conference last month. We had good attendance at both events, and I was glad to meet more of you.

Our October Meeting will be on October 16th, and we will be touring the Mutual of Omaha Tower Construction Site and a gathering for refreshments and networking afterwards. Please watch our website and your emails for more information.

Those of you who came to our September meeting may have noticed that we are using a new registration system for our events this year. The new system is part of ASCE Collaborate and has numerous new features that we hope to take advantage of. Please bear with us while we work out all the bugs with the new system, and if you run into any issues, please feel free to email me and we can get it sorted out.

Finally, I would like to remind you all as the year end approaches to renew your ASCE membership. This can be done at [ASCE.org](https://www.asce.org) by clicking on the Membership tab near the top of the page. This is also an excellent time to review your contact information to make sure you receive all our notifications about upcoming events.

Sincerely,

Andrew Eisenbraun

September Meeting Recap

Thank you to everyone who attended the ASCE Nebraska Section Structural Technical Dinner at Aksarben Beacon Hills on Thursday, September 14th. Around 35 attendees came to learn about tornado shelters (meeting the ICC 500 standard) and safe rooms (meeting the FEMA P-361 criteria) presented by Dr. Marc Levitan, who is the Lead Research Engineer for the National Windstorm Impact Reduction Program at the National Institute of Standards and Technology (NIST). The presentation covered a brief history and overview of the tornado protection options, explain the differences between tornado shelters, safe rooms, and best available refuge areas, summarize code and standard requirements for shelters, and explain why shelters can't be designed using only the new tornado load chapter in ASCE 7-22. We would like to thank Dr. Levitan for sharing his knowledge and experiences with us.

2023/24 NE ASCE Newsletter Advertising and Job Board

The Nebraska ASCE newsletter is the primary communication for our 600+ members who can gather information on monthly meetings, upcoming seminars and workshops, volunteer opportunities and other news and events going on in our community. Advertising in the NEASCE Section Newsletter can have many advantages. The newsletter is sent to each member of the Nebraska Section across the state typically eight times per year and is also available in the newsletter section on our website (www.neasce.org).

Your company can support the NEASCE for the 2023-20234 year by advertising in our newsletter. We are also offering the opportunity for companies to advertise open positions on our job board section of the newsletter.

If your company is interested in advertising, please contact Nicole Martindale, Newsletter Editor, at 402-670-6723 or nicolepmartindale@gmail.com.

Applications for advertisements will be due by November 1st.
